## Updated & Upgraded! 150 Wooster Loft No. 2

Looking for an update on your current living situation? Well, today we get a look at a stunning loft that is on the market, that is sure to upgrade your situation. Today we take a look at 150 Wooster Loft No. 2. This beautiful loft is a vintage SoHo residence that features an interior with large-scale windows, reminiscent of the artist's lofts of the 60s and 70s.

The large plank white oak floors, 18-inch millwork baseboards, and integrated lighting makes a nice touch and brings the space up to date. A sculptural fireplace divides the main area into a living and dining room while a waterfall island made completely from Danby marble is the centerpiece of the chef's kitchen. The Danby marble is found in the master suite on the bathroom vanities, mosaic floors, and slab walls. The loft features over 4,000-square-feet of interior space also featuring a private outdoor garden. Have a look at the eye-catching loft in the images below and give us your thoughts in the comments. Stay tuned for more outstanding architecture and design coming soon.
