Kitchens That Will Encourage You to Cook in the New Year

Your goals for the new year likely involve eating more healthfully. These kitchens offer plenty of inspiration for you to cook at home, whether you're looking to keep your resolutions to eat well or expand your culinary horizons.

38 Prince St.

This former church space is converted into a unique condo with views of the former Cathedral. The smart layout means you'll find a spacious kitchen lined with handsome marble countertops, upscale cabinetry, and a precious La Cornue stove. And if you want to grow your own herbs in the warmer months, a bi-level garden with an outdoor kitchen is just steps away. \$25 million; contact CORE agent Patrick V. Lilly, 212-612-9681
