## PUT IT TO USE IN NEW YORK

*“New York is a true melting pot of culinary, cultural, financial, social, and creative people, where the cream can rise to the top! The dining scene here is particularly special, and because of the abundance and convenience of incredible restaurants in New York, most people eat out. However, lately, I’ve started to see a trend in more people actually using their kitchens for functional purposes rather than just looking at them like a piece of furniture.”* –SHAUN OSHER, CORE
